## THE NAIROBI HOSPITAL

Patient Name	STEPHEN OTIENO		
Patient ID	1000234523	Completed Date	17/11/2021 2:16PM
Gender/Age	M/41 y	Modality	CR
Ref. Phys.			
Procedure Name	X-RAY - RIGHT KNEE WITH SKYLINE		

### RIGHT KNEE RADIOGRAPH

**Clinical History:** Patellofemoral chondropathy

**Findings:**

Normal alignment of the knee joint is maintained.

Joint space is reduced.

Marginal osteophytes rare noted in the tibiofemoral and patellofemoral joints with associated subtle subchondral lucencies.

Enthesophytic changes are visualised in the superior pole of the patella

Soft tissue density is visualised in the region of the suprapatellar bursa suggestive of a joint effusion.

The rest of the periarticular soft tissues are unremarkable.

**Conclusion:**

- Osteoarthritic changes of the knee.
- Patella enthesopathy.
- Joint effusion.
